Lesson matches original description in provider application			X		-Reviewer logged into provider's online "Virtual Tutor Program" as a student. The program administered a pre-test to establish the "student's" ability level. Once the pre-test was completed, the "student" was able to begin lessons that were developed based on skill gaps identified in the pre-test. Throughout the assessment and also during lessons, the "student" was provided a study break opportunity by playing brief interactive sports games; -Observed lesson matches description in provider application.
Instruction is clear			X		Instructions were clarified by the computer when the student appeared to be unclear. The computer program provided the "student" an explanation when the incorrect answer was given. The program provided written text explanations and examples for the "student" the first time an incorrect response was given and then prompted the student to select from the remaining multiple choice options. If the student provided a second incorrect answer to the question, the program displayed the correct answer and then asked continual follow up questions related to the same concept until the "student" demonstrated an understanding of the concept.
Time on task is appropriate					Not applicable. Reviewer completed online lesson, no actual student was observed.
Instructor is appropriately knowledgeable					Not applicable. Computer program was the instructor.
Student/instructor ratio:					Not applicable. Reviewer completed online lesson, no actual student was observed.
